

NGMN - Next Generation Mobile Networks Alliance Company Profile

The NGMN Alliance (NGMN) is a forum founded by world-leading Mobile Network Operators and open to all Partners in the mobile industry. Its goal is to ensure that next generation network infrastructure, service platforms and devices will meet the requirements of operators and ultimately will satisfy end user demand and expectations. The vision of NGMN is to provide impactful industry guidance to achieve innovative, sustainable and affordable mobile telecommunication services for the end user, since beginning of 2021 with a particular focus on Mastering the Route to Disaggregation / Operating Disaggregated Networks, Green Future Networks and 6G, whilst continuing to support 5G's full implementation.

NGMN seeks to incorporate the views of all interested stakeholders in the telecommunications industry and is open to three categories of participants/NGMN Partners: Mobile Network Operators (Members), vendors, software companies, system integrators and other industry players (Contributors), as well as research institutes (Advisors). NGMN invites all parties across the entire value chain to join the Alliance in these important endeavours.

The organisation is established as highly flexible and effective with governance structures characterised by short decision-making paths, efficient processes as well as a pragmatic and project-oriented mode of operation.

The Work Programme is executed through projects and task forces, which are assessed, initiated, supervised and approved by the Board. The Work Programme is guided by a structured process with clearly defined procedures to initiate, produce, approve, and disseminate the NGMN Alliance publications which are required to achieve NGMN's objectives for providing impactful guidance to the industry in general and to Standards Development Organisations (SDOs).
